

WINTER OILSEED RAPE

Croozer is a restored hybrid with a Specific Recommendation (Sp) by AHDB for the E/W region in 2021/22 for growing on land infected with common strains of clubroot. It has a high gross output, is early maturing with a high oil content and yield, and very good resistance to Stem canker.

KEY CHARACTERISTICS

Data Source: Recommended List for winter oilseed rape 2021/22 reproduced with full acknowledgement to AHDB.

- High seed yield combined with high oil content
- Very good resistance to Stem canker
- Good Stem stiffness and Resistance to lodging

OUTPUT	
Gross output (yield adjusted for oil content)	101
Oil content	44.8
AGRONOMICS	
Resistance to lodging	(8)
Stem stiffness	8
Shortness of stem	6
Earliness of flowering	8
Earliness of maturity	6
DISEASE	
Light leaf spot	6
Stem canker	8

Ratings above are 1-9. A high rating indicates that the variety shows the character to a high degree
