

## WINTER OILSEED RAPE

Cello CL is a Clearfield® Hybrid from LSPB offering a high yield that is comparable with standard hybrids and outperforming other CL offerings. Its short, stiff straw offers an easier harvest. For those looking towards an earlier drilling date, Cello offers outstanding vigour even in high SU residue areas.

### KEY CHARACTERISTICS

- High Yield Level
- Good Stem stiffness
- Outstanding Vigour

*(Data from Niab 2020 field trials, data collected using fitcon to represent performance)*

#### OUTPUT

Gross output (yield adjusted for oil content)	96
Oil content	44.96

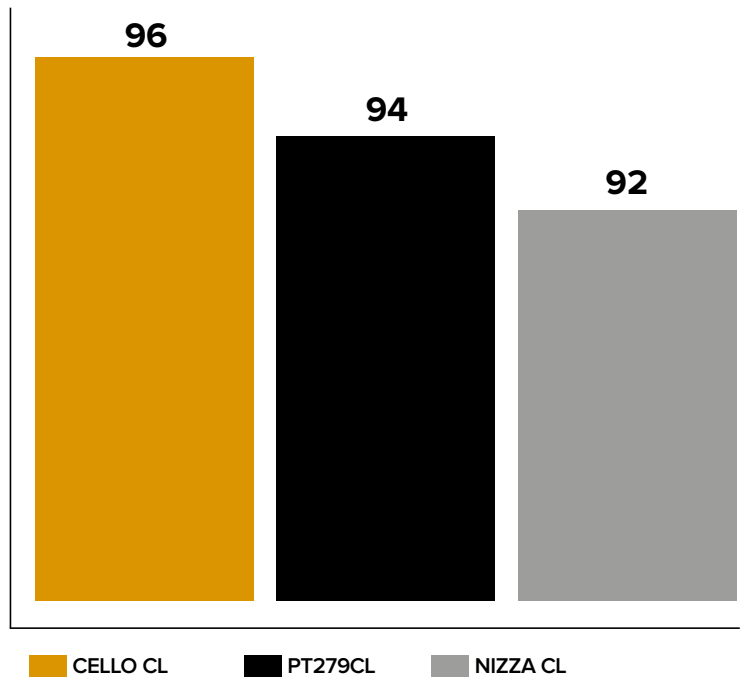

#### AGRONOMICS

Early Vigour	6.8
Stiffness	7.2
Height (cm)	144
Earliness flowering	3.6
Earliness Maturity	5.7

#### DISEASE

Disease is not assessed in Niabtag CL trials, but assessments in UK field trials show medium resistance to LLS and Stem Canker.

#### GROSS OUTPUT % CONTROLS
