

WINTER OILSEED RAPE

Croozer is a restored hybrid with a Specific Recommendation (Sp) by AHDB for the E/W region in 2022/23 for growing on land infected with common strains of clubroot. It has a high gross output, is early maturing with a high oil content and yield, and very good resistance to Stem canker.

KEY CHARACTERISTICS

Data Source: Recommended List for winter oilseed rape 2022/23 reproduced with full acknowledgement to AHDB.

- High seed yield combined with high oil content
- Very good resistance to Stem canker
- Good stem stiffness and resistance to lodging

OUTPUT

Gross output (yield adjusted for oil content)	96
Oil content	44.5

AGRONOMICS

Resistance to lodging	8
Stem stiffness	8
Shortness of stem	7
Earliness of flowering	8
Earliness of maturity	6

DISEASE

Light leaf spot	6
Stem canker	8

Ratings above are 1-9. A high rating indicates that the variety shows the character to a high degree
