

## WINTER OILSEED RAPE

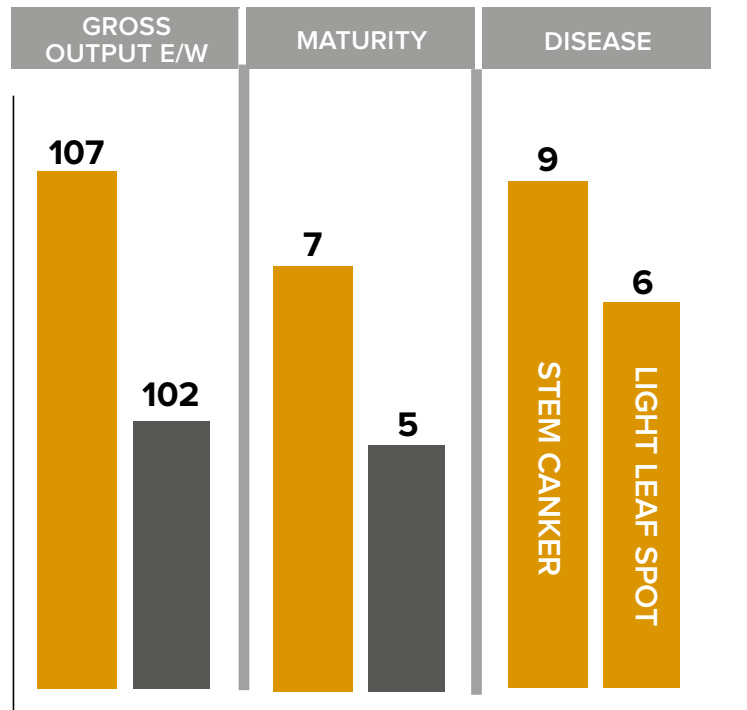

Picasso is a restored hybrid with high resistance to Stem canker from a Phoma resistance gene called RLM7 and is also resistant to TuYV. It is exceptionally vigorous and early to mature with good stem stiffness and resistance to lodging.

### KEY CHARACTERISTICS

- High seed yield combined with high oil content
- High Rlm7 resistance to Stem canker and TuYV resistant
- Good stem stiffness and resistance to lodging

OUTPUT E/W REGION	
Gross output (yield adjusted for oil content)	107
Oil content	44.8
AGRONOMICS	
Resistance to lodging	9
Stem stiffness	8
Height (cm)	144
Earliness of flowering	6
Earliness of maturity	7
DISEASE	
Light leaf spot	6
Stem canker	9

Ratings above are 1-9. A high rating indicates that the variety shows the character to a high degree
